Cheese

Mozzarella, cheddar and processed, perfect for pizzas, pastas, burgers and more.

Perfect Italiano Traditional Mozzarella

Perfect Italiano Mozzarella is ideal for commercial kitchens, delivering the performance you know and trust. Renowned for superior stretch and coverage with even blister and minimal oiling off, you can rely on Perfect Italiano Traditional Mozzarella to deliver perfect pizzas every time.

Key benefits

Superior Stretch

Delivers outstanding cheesy stretch, so customers enjoy a delicious, authentic pizza experience every time.

Perfect Melt

Perfect melt and coverage, ensures you achieve a great appearance, keeping customers content with every slice.

Minimal Oiling Off

With great reheat performance, this mozzarella has minimal oiling off which makes it ideal for home delivery.

Storage & Handling

Cutting

The Perfect Italiano 5kg block is smaller, making it easier to handle and reduces the amount of cutting and handling required and increases freshness.

Storing

Shelf life under refrigerated conditions is at least 6 months.

Perfect Italiano Ultra Mozzarella Shredded

A low-browning Mozzarella, ideal for high temperature ovens or dishes that need to be cooked for longer periods. With excellent coverage it blisters evenly with minimal oiling off.

- Low browning
- Superior stretch

- Easy to mix and spread
- Excellent bake stability

Dietary Information

Halal ✓

Variant Name	Size	Packsize	Item Code
Anchor Cream Cheese	1kg	12	114599

Cream Cheese

A deliciously fresh, soft cheese made with milk and cream. Widely used to enrich a range of sweet and savoury dishes, its versatility makes it a true foodservice champion.

Key benefits

Excellent stability

With great bake stability and moisture retention, our cream cheese gives cheesecakes a smooth, soft texture with less cracking or slumping.

Authentically tasty

With a smooth body and mild, creamy flavour, our cream cheese meets customers desire for naturally tasty food.

Economical

Because our cream cheese has a generous fat content, chefs can add in lower cost ingredients, such as milk, without worrying about compromising flavour or texture.

THE GUIDE TO A PERFECT BAKED CHEESECAKE

The hallmarks of a great cheesecake include a consistent smooth texture and mouthfeel. It should be beautifully flat on the surface and hold it's shape well.

servicing suggestion

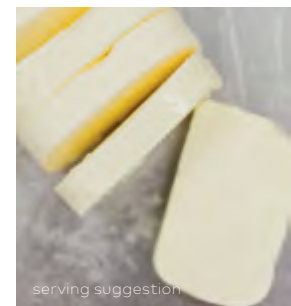

1. FIRST THINGS FIRST

Be sure to use the right cream cheese for the job.

2. CHECK TEMPERATURE

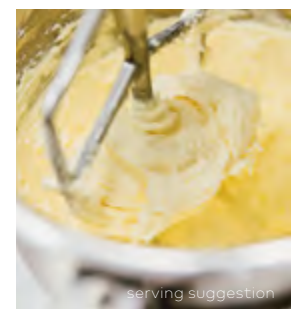

Before mixing, make sure the cream cheese and eggs are at the same temperature – this will help prevent lumps in the batter.

servicing suggestion

3. WATCH THE MIX

When mixing your batter, add one egg at a time and don't overmix – this helps prevent the cheesecake from cracking.

servicing suggestion

4. TAKE YOUR TIME

Bake your cheesecake 'low and slow'. This will ensure it has the desired smooth texture.

Butter & Spreads

Specialist butters made from pasteurised cream coming from predominantly pasture fed cows.

Butter

Bursting with flavour, pure butter is the smart choice for every kitchen and bakery. In an age where consumers want food that is both natural and delicious, it meets both of those needs across a wide range of applications.

Key benefits

Naturally better

After decades of misinformation about the role fat plays in a healthy diet, butter is well and truly back on the menu.

Naturally pure

In an age where consumers want food that is both natural and delicious, it makes good business sense to choose ingredients that are as close to their natural state as possible.

Naturally delicious

Butter has a deliciously unique flavour which makes it perfect for a wide variety of applications in kitchens and bakeries.

Storage & Handling

For best results

Once opened, butter should always be stored chilled in an airtight container or tightly cling wrapped as butter easily absorbs odours.

Butter can be frozen (store below -9°C) until needed. Thaw in a refrigerator fully wrapped, allow 24hrs (at $2-4^{\circ}\text{C}$).

pastas made faster*

Culinary Cream

Versatile high-performance culinary creams that require no reduction and provide extra yield.

Extra Yield Cream

Anchor Extra Yield Culinary Cream requires no reduction, saving valuable time in the kitchen. With one litre in the pack equalling one litre in a recipe, creating great pasta dishes becomes much easier.

Key benefits

Saves more than time

Pre-reduced to save you time and give you great value in the kitchen.

Excellent coating

Coats pasta superbly so you can be confident of the same smooth, creamy serve every time.

Acid stable, won't split

Won't split or curdle, making it ideal not only for acidic and spicy recipes but also for chilled or frozen sauces made ahead of time.

Storage & Handling

For best results

To achieve a natural, rich dairy flavour, texture and colour, Anchor creams undergo a process known as Ultra Heat Treatment (UHT). Exposing the cream to high temperatures for a short burst of time ensures a longer shelf life and preserves the product's nutrients and sought-after flavour.

Has a shelf life of 9 months when refrigerated between 2-4°C. Once opened consume within 3 days.

Milk

Sourced from high quality dairy farms, our milk is available in a range of varieties and is ready to use when you want it.

Anchor Barista Milk

Anchor Barista milk provides the goodness of milk with the versatility of being ready when you need it. Ideal for creating a soft, smooth-pouring microfoam and latte art.

Key benefits

Ready when you need it

Because it's able to be stored in the store room at room temperature, it's ready to be used any time you need it.

Made for coffee

Good coffee is simply not complete without the right milk. Anchor Barista Milk is made to create a soft, smooth and creamy microfoam that partners perfectly with a well made coffee.

Long Life

Ultra high temperature pasteurisation locks in the freshness and increases shelf life.

Storage & Handling

What is UHT Milk?

UHT stands for "Ultra High Temperature". This type of processing sterilises the milk then places it in packaging that blocks light and oxygen and helps to keep the milk sterile, creating a product that can stand on the shelf for a longer period of time compared to fresh refrigerated milk.

How should I store my Anchor UHT Long life Milk?

Unopened cartons of Barista milk will keep until their best before date. Once opened, milk will need to be refrigerated below 4°C and consumed within seven days.

Australians are drinking more coffee than ever and their palettes are getting more sophisticated.

Make sure you capitalise on this trend by employing a well-trained Barista and order good quality milk.
